

SUNSEEKER

OCEAN 156

Sea trial report

Length overall

82 ft.

Displacement

85 000 kg

Interceptors

2x X450 + 2x X750

Date of issue

03-02-2025

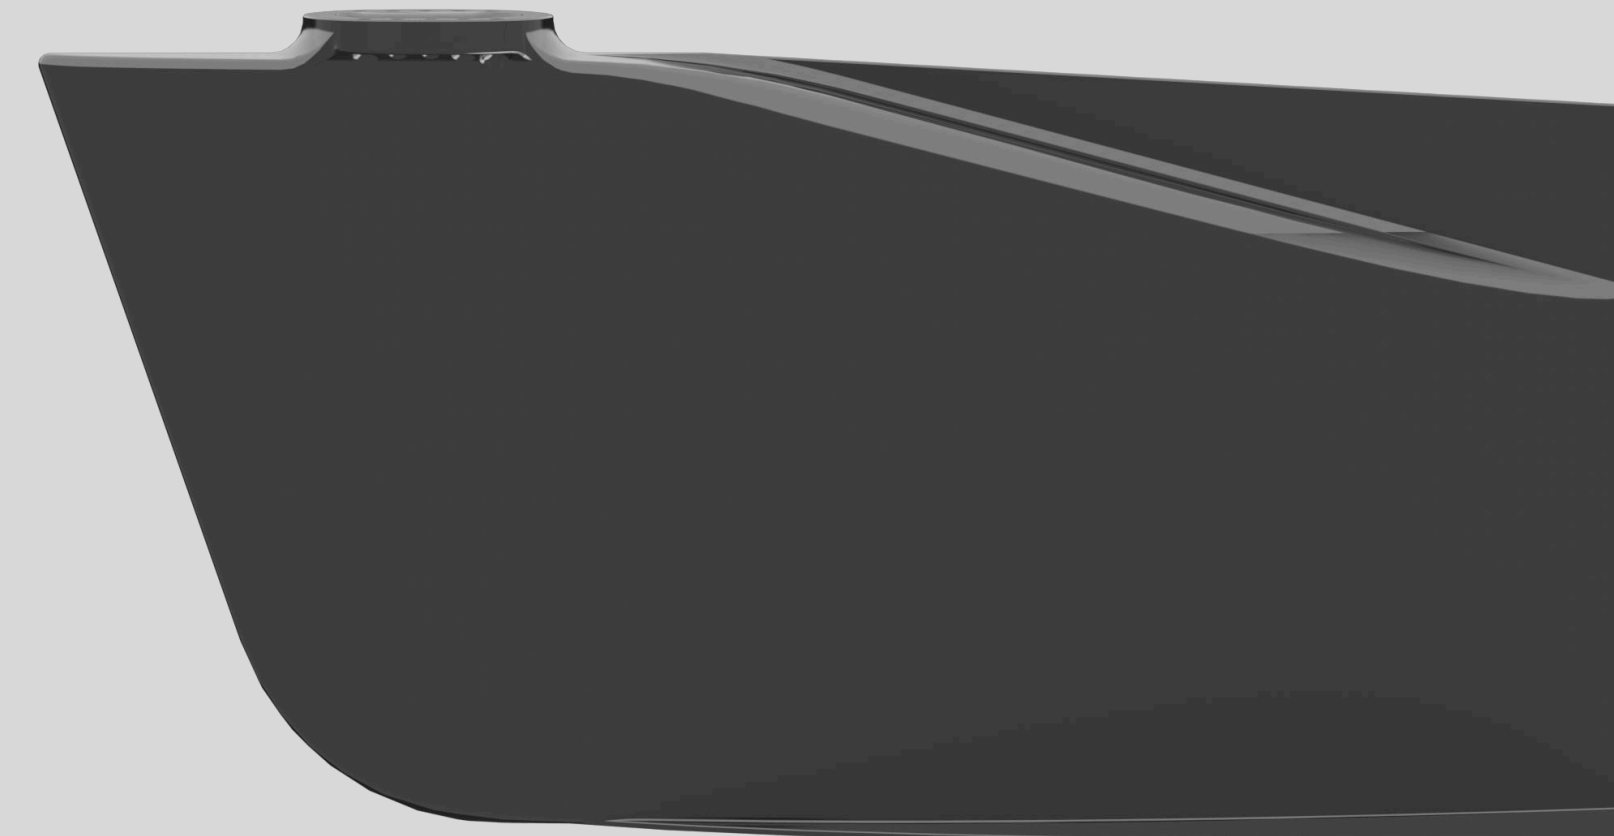

Sea conditions

Smooth, 3m/s wind

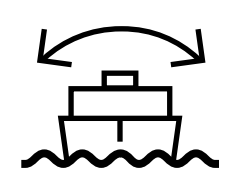

Fins

Twin 1,3m²

All speed carbon fin

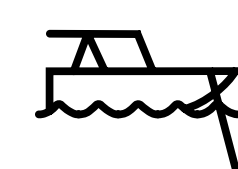

PERFORMANCE FIGURES

79.6%

Underway stabilization

89.9%

Zero speed stabilization

- Highest result stern anchor mode resulted in above 80% stabilization.
- Coordinated turn improves heel angle, and controls the boat to heel inwards while turning.
- Underway stabilization at 80% in 19knots.
- Better course keeping underway, results in less autopilot work.
- 1kn speed increase when interceptors are turned on.
